

OCTO GARDEN EDGE & PIN

OCTO GARDEN EDGE are an injected recycle high polyolefin garden edges that are UV resistant certified in Singapore.

OCTO GARDEN EDGE serves as an excellent barrier against weeds and grass, making it ideal for various landscape applications, including defining garden beds in relation to your lawn area.

OCTO GARDEN EDGE is commonly used to create neat and tidy barriers in gardens, offering a clean edge for garden beds and pathways.

OCTO GARDEN EDGE can be utilized for constructing tree guards or incorporated into concrete work.

OCTO GARDEN EDGE is characterized by its exceptional toughness, durability, and flexibility.

- It is strong, lightweight, and flexible membrane that is UV stabilized, waterproof, and incredibly easy to install.
- With a thickness of 3.0mm, **OCTO GARDEN EDGE** provides a robust barrier that effectively prevents roots from escaping.
- Perfect for creating garden barriers, tree guards, and concrete work.
- Eco-friendly.
- Tough and flexible.
- Available colours in Black, Green & Brown.
- Available in standard height / width as below mentioned table.
