

RainSaver® Rainwater Harvesting System

TERA Series - Underground Rainwater Tank

Description

- High structural integrity designed for underground rainwater harvesting system
- Large storage capacity up to 3,000 litres
- Suitable for residential buildings that require large capacities without compromising on living space.

Features (ZeoTech)

- Uni-body and seamless construction for zero-leak operation throughout its lifetime.
- Use of food-grade material ensures no toxicity nor odor are imparted into the water.
- Light weight and ruggedness facilitate speedy installation and easier handling and transportation.

Technical data

Model	: TERA 1200 / 2000 / 3000
Capacity (litre)	: 1,200 / 2,000 / 3,000
Dimension (mm)	: T1200 - 1,300(dia) X 1,330(h)
	: T2000 - 1,450(dia) X 1,760(h)
	: T3000 - 1,625(dia) X 1,740(h)
Material	: Polyethylene (PE)
Color	: Black

* Please contact us for larger capacity of underground tank requirement.

Compact filter

First flush diverter

Calmed inlet

Overflow siphon
