

OCTO PLASTIC PLANT POT 310 (Without Drainage Holes)

COLOUR	
Black	Brown

The **OCTO Plastic Plant Pot 310(Without Drainage Holes)** is an ideal container for growing aquatic plants, including water lilies. Made from durable and lightweight polypropylene (PP) material, this pot is easy to handle and move, even when filled with soil and water. Unlike traditional pots, the **OCTO Plastic Plant Pot 310(Without Drainage Holes)** features a solid base with no drainage holes, making it perfect for aquatic plants that thrive in waterlogged conditions.

The lack of drainage holes ensures that the soil and water will not dry out, creating the ideal environment for plants like water lilies. The pot is available in black and brown, offering a sleek and stylish look that complements any aquatic setup, whether indoors or outdoors.

Overall, the **OCTO Plastic Plant Pot 310(Without Drainage Holes)** is a practical and attractive choice for anyone looking to grow aquatic plants, offering the right balance of durability, design, and functionality.
